

Dear APCS Students and Parents,

In April, we will be reviewing in preparation for the AP exam on Friday, May 17, 2019. In order to prepare for this exam, I would like all students to obtain a copy of ***Be Prepared for the AP Computer Science Exam in Java, 6th Edition***, by Maria and Gary Litvin. These workbooks contain lots of good exam information and 5 practice exams. I would like to use these exams for both in-class review and homework.

The workbook is offered by online retailers, like Amazon, or you can order the workbook from Monta Vista HS for **\$21.00**. MVHS has a web site that takes online payments through Paypal. Go to the following web page, fill out the information requested, and make your payment.

http://montavistahs.3dcartstores.com/AP-Computer-Science-workbook_p_74.html

The deadline for ordering from the MVHS web site will be **Monday, February 25, 2019**. Books ordered from MVHS will be distributed in class early April.

Since MV is a public school, students are not obligated to purchase a workbook. The school will have extra copies available to loan out. These copies must be used inside the classroom and the student may not mark inside the books. These copies will be available during class, before school, during brunch, lunch, and after school.

Let me know if you have any questions.

Sincerely,

David Greenstein
